

CLAIM AMENDMENTS

Claim 1 – 5 (canceled).

A) Claim 6 (new): Mobile communication device comprising a first housing component having front and back sides with a first keyboard arranged at the front side for entering communication numbers and a second housing having front and back sides with a second keyboard (1) arranged in the front side of the second (2) housing component, wherein the second housing component is connected mechanically by means of hinges (10, 11, 12, 13) to the first housing component, whereby the first and second keyboards can be arranged in a single plane by folding out the second housing component, characterized in that the keyboards are so arranged in the respective front sides of the first and second housing components that, when the second housing is folded back, the second housing component back side is on the back side of the first housing such that the second keyboard faces away from the first keyboard.

Claim 7 (new): Mobile communication device according to Claim 6, characterized in that after opening the keyboards are arranged side by side.

Claim 8 (new): Mobile communication device according to Claim 6, characterized in that at least the second keyboard comprises a keyboard including a film keyboard, a push button keyboard and/or a touchscreen display keyboard.

Claim 9 (new): Mobile communication device according to Claim 7, characterized in that at least the second keyboard comprises a keyboard including a film keyboard, a push button keyboard and/or a touchscreen display keyboard.

Claim 10 (new): Mobile communication device according to Claim 6, characterized in that several touchscreen display pages (6, 7, 8) are arranged aside the second keyboard (1, 9) and can be swiveled by means of hinges (10, 11, 12, 13).

Claim 11 (new): Mobile communication device according to Claim 7, characterized in that several touchscreen display pages (6, 7, 8) are arranged aside the second keyboard (1, 9) and can be swiveled by means of hinges (10, 11, 12, 13).

Claim 12 (new): Mobile communication device according to Claim 8, characterized in that several touchscreen display pages (6, 7, 8) are arranged aside the second keyboard (1, 9) and can be swiveled by means of hinges (10, 11, 12, 13).

A/ Claim 13 (new): Mobile communication device according to Claim 6, characterized in that the second keyboard (1, 9), when it is opened or closed, respectively, is connected to or disconnected from the front side keyboard by means of a contact.

Claim 14 (new): Mobile communication device according to Claim 7, characterized in that the second keyboard (1, 9), when it is opened or closed, respectively, is connected to or disconnected from the front side keyboard by means of a contact.

Claim 15 (new): Mobile communication device according to Claim 8, characterized in that the second keyboard (1, 9), when it is opened or closed, respectively, is connected to or disconnected from the front side keyboard by means of a contact.

Claim 16 (new): Mobile communication device according to Claim 10, characterized in that the second keyboard (1, 9), when it is opened or closed, respectively, is connected to or disconnected from the front side keyboard by means of a contact.
